

# Web, Mobile and Security

---

## Lab: Ristorante Ratatouille - Responsify

### 0. Purpose

Bring the exercise **Ristorante Ratatouille** to the year 2020 and make sure it is responsive.

### 1. Creating the project

- Create a new plain project called **ristorante-ratatouille**.
- You can find the start project here: <https://op-gitlab.howest.be/TI/2019-2020/s2-web-mobile-and-security/lab-solutions/09-responsive-design/01-start-project>

### 2. Guidelines

- You may change all CSS you want.
- You will most definitely need to remove certain things.
- Try to limit the use of media queries: in the example, media queries are only used for navigation as well as for the h2 background image.
- This is an exercise without CSS grid, but if you want you can modify this.
